RAVINDRA SURATHU

Middleware & Infrastructure Operations Engineer

Hyderabad, India | ravindra.surathu@hotmail.com | +91 99333 37975
linkedin.com/in/ravindra-surathu | github.com/RavindraSurathu | ravindrasurathu.github.io

PROFESSIONAL SUMMARY

Systems operations engineer with 6+ years of L2/L3 production support for enterprise applications and web middleware on Windows and Linux, in the insurance (BFSI) and aviation domains, across Production, UAT, DR and Development. Maintains 99.9%+ availability for a baggage reconciliation platform at international airports.

Deep hands-on IIS experience (IIS 6–10 web farms hosting enterprise .NET applications) and production support of Apache HTTPD, Tomcat, WebSphere, Nginx and F5 BIG-IP: configuration, patching, SSL/TLS, platform restarts, change execution and post-deployment validation. Strong in log analysis, incident triage and RCA, working within ITIL incident, change and problem management in ServiceNow, under SLA.

Automates operations for 100+ servers with Ansible, PowerShell and Bash (~80% less manual effort), and uses Claude and Microsoft Copilot for scripting, runbooks and RCA. Administers IBM MQ on Windows and Linux (queue manager, channel and queue status, queue depth) for airline messaging integrations, and works with AWS and Microsoft Entra ID; building Docker, Kubernetes and Terraform skills.

TECHNICAL SKILLS

Middleware & Web	IIS 6–10 (web farms, app pools, bindings, SSL), Apache HTTPD, Apache Tomcat, IBM WebSphere, Nginx, Node.js
Troubleshooting	Log analysis, HTTP/IIS error triage, DebugDiag crash and hang dump analysis, performance triage, Root Cause Analysis
ITSM & Process	ServiceNow (Incident, Change, Change Task, Problem, Request), BMC Remedy, Cherwell, ITIL, CAB, SLA management
Automation	Ansible (playbooks, roles), PowerShell (incl. WinRM remoting), Bash/Shell Scripting
CI/CD & Version Control	Git, GitHub, GitHub Actions, Jenkins
Monitoring	Grafana, Nagios, Site24x7, Power BI operational reporting
Operating Systems	Windows Server 2003–2025, Linux RHEL (services, cron, patching, user management)
Messaging & Integration	IBM MQ administration on Windows & Linux (queue manager, channel and queue status, queue depth monitoring with runmqsc), SITA & Amadeus messaging, IATA BSM/DELBSM, REST APIs
Networking	F5 BIG-IP load balancing, DNS, TCP/IP, HTTPS, SSL/TLS certificate lifecycle
Security & Compliance	Vulnerability Remediation (Tenable, Nexpose), Patch Management, Server Hardening, insurance (BFSI) environments
Cloud & Identity	AWS (EC2, IAM, VPC, Route 53, EBS, S3), Microsoft Entra ID (SSO, MFA), Active Directory, Group Policy
Virtualization	Hyper-V, VMware ESXi/vSphere (basic), Dell iDRAC
Containers (projects)	Docker, Kubernetes, Terraform (BagTrace project on GitHub)

PROFESSIONAL EXPERIENCE

Unisys India Pvt. Ltd.

Aug 2021 – Present

Senior Maintenance & Support Engineer (Feb 2025 – Present) | Application Development Engineer (Aug 2021 – Jan 2025)

Aviation Client – Airport Baggage Reconciliation System (Zafire FirstBag)

- Provide L2/L3 production support for FirstBag across international airports, maintaining **99.9%+ availability** for airline and ground-handling operations.
- Handle incidents, changes, problem records and service requests in ServiceNow within SLA; execute approved changes, service restarts and post-change validation.
- Troubleshoot application and integration issues through log analysis, including **IATA BSM/DELBSM** message flows between airline DCS systems and FirstBag across SITA, Amadeus and IBM MQ.
- Administer **IBM MQ on Windows and Linux**: check queue manager, channel and queue status with runmqsc, monitor queue depth, and trace airline baggage messages through MQ to the application.
- Onboard new airlines end to end: DCS integration, message gateway configuration and testing.
- Automated Windows patching and controlled reboots for **100+ servers** with Ansible and PowerShell over WinRM, replacing manual server-by-server patching.

- Built PowerShell and Ansible automation for health checks, Tenable/Nexpose remediation and reporting, **reducing manual effort by ~80%**.
- Migrated Domain Controllers from Windows Server 2016 to 2022 with **zero production downtime**.
- Designed and implemented Microsoft Entra ID SSO and MFA onboarding for airline users, with a guest registration portal API on Microsoft Graph.
- Monitor with Nagios, Site24x7 and Grafana; write SOPs, runbooks and RCAs, using Claude and Microsoft Copilot to speed up documentation and analysis.

Globe Life Insurance (BFSI) – Enterprise Web Platforms

- Administered **IIS 6–10 web farms** hosting enterprise .NET applications across development, staging and production: app pools, bindings, deployments and recycling.
- Remediated Windows Server and IIS vulnerabilities (missing patches, outdated components, insecure configurations, weak TLS) through to rescan and closure.
- Implemented **GPO-driven automated RDP certificate renewal** across the estate, eliminating a recurring vulnerability class.
- Subject Matter Expert for OpenText RightFax and GlobalSCAPE EFT: upgrades, patching, vendor coordination and licensing.
- Wrote RCAs for Sev1/Sev2 incidents, presented changes at CAB, and contributed to Disaster Recovery and IP consolidation.
- Built Power BI dashboards on live ServiceNow data for monthly and quarterly operational reporting.

Portakabin – AWS-hosted Applications

- Supported application deployments on **IIS, Apache, Nginx and Node.js** with tested rollback plans across Production, UAT and Development.
- Supported AWS-hosted Windows and Linux servers: EC2, EBS, IAM, Security Groups, Route 53 and snapshots.
- Owned the SSL/TLS certificate lifecycle (requests, renewals, chain validation, bindings) with **zero certificate-expiry incidents**.

Sonyo Management Consultants Pvt. Ltd. — Aug 2020 – Aug 2021

Senior Administrator | Client: Unisys / Globe Life Insurance (BFSI)

- Supported IIS 7.5/8.5 production web farms hosting ASP.NET applications and led application migrations from IIS 7.5 to 8.5.
- Used **DebugDiag** to capture and analyse crash and hang dumps for root cause analysis during application outages.
- Managed F5 BIG-IP load balancer configurations, traffic routing and failover testing.
- Performed server hardening, patching and daily health checks; supported releases through ITIL change management.

PROJECTS

BagTrace: 3-tier DevOps project – github.com/RavindraSurathu/bagtrace-devops — **2026**

- Web app (Nginx, Python API on gunicorn, MySQL) deployed with **Shell scripts, Ansible roles, Terraform on AWS, Docker Compose and Kubernetes**, with health checks, systemd services and GitHub Actions CI.

EDUCATION

Master of Information Technology (Computer Networks) – Charles Sturt University, Melbourne, Australia — **2018**

Bachelor of Technology (Electrical & Electronics Engineering) – JNTU Kakinada — **2015**

CERTIFICATIONS & TRAINING

AWS Certified Cloud Practitioner — **2023 – 2026**

DevSecOps with AWS – AI Assisted, Joindevops – Linux, Docker, Kubernetes, Terraform, Jenkins — **In progress**
